**PLANT IN MAY AND
GAIN A YEAR**

PLANT IN MAY—SAVE A YEAR'S TIME

PROMPT SHIPMENT GUARANTEED

NO matter where you live or how far advanced vegetation is in your locality, our trees and plants here in the north are perfectly dormant and in splendid condition for planting in any locality. Roots are properly packed in plenty of soaking wet packing material to keep them in good planting condition while in transit.

MAY IS AN IDEAL MONTH TO PLANT

Another outstanding characteristic of this wonderful Peach is that it frequently bears the first season planted.

Always the second year.

Breaks records the third year.

Trees planted in Spring of 1922 bore 150 to 200 perfect peaches past Summer.

ROCHESTER is a large yellow and red freestone, flesh yellow, very highly flavored. To eat fresh out of hand or canned, it cannot be equalled as a table delicacy. Stone very small and will ship as good as an Elberta. The peach comes into ripening when there is no other yellow and red free-stone with quality on the market, hence it commands the very highest market

price, ripening as it does, the middle of August. The tree is a strong upright grower, hardy as an oak, has stood 16 degrees below zero and produced a good crop while Elberta and Crawford, under the same conditions in the same orchard, produced no blossoms, consequently no fruit.

Every year is a Rochester Year—it's all Peach

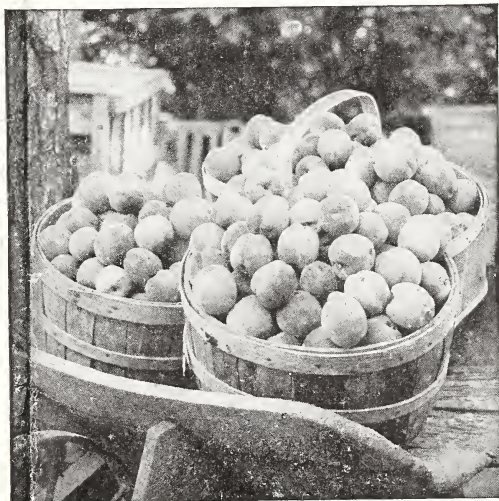

PRICES—Medium Size, \$1.00 each; \$10.00 per 12

Large Size, \$1.50 each; \$15.00 per 12

Extra Large Size, \$2.00 each; \$20.00 per 12

Delicious Washington Asparagus

Extra Large and Heavy 3 Year Old Roots for Quick Cutting Everyone, Everywhere, Should Have Their Own Asparagus Bed

Easy To Grow As 2 + 2

FOR success, the soil in which Asparagus roots are planted should be well drained, and while it does not need to be necessarily rich, always remember the richer the better. Set the roots in trenches, six to ten inches deep, and cover with only a few inches of soil; as the plant grows the soil can be levelled in. A heavy mulch of coarse manure should be given in the late fall. Be sure and cut the tips off before the seeds begin to ripen.

The New Rust Resisting Variety Developed by The United States Department of Agriculture

Washington Asparagus is the first result of a blister proof campaign for the eradication of asparagus rust and is as far as possible an extremely resistant, vigorous, and high yielding strain of giant asparagus. The plants represented in Pedigreed of the last three generations are the best found in a ten-year search among millions of plants tested.

By best we mean the ones that have produced offspring uniform—rust resistant—high yielding—large size—unbranched shoots—with good top buds of rapid growth which indicates tenderness.

For quick results plant these extra heavy roots 3 years old

Prices: \$7.00 per 100, \$30.00 per 500, \$55.00 per 1000

Remember—you risk nothing. If upon receipt of shipment you find that the plants are not the finest and largest 3 year asparagus roots you have ever seen, wrap them up and return to us, and we will refund your money without question, quibble or controversy.

We Also Offer Pedigreed Washington Asparagus In 2 Year Old Plants

For those who can wait longer for results, these fine 2-year old plants should make sufficient growth for cutting the second year.

Prices: 2-year old plants, \$3.50 per 100, \$30.00 per 1000

Why pay fancy prices for Asparagus—Grow your own.

Improved Thornless Dewberries

Large, jet black, luscious fruit

LARGER, finer and better flavored than blackberries and the real dewberry flavor. Absolutely thornless. The fruit is easy to gather, neither gloves nor courage needed. Fruit is jet black, of large size, sweet and borne profusely. Should be planted in every home garden and is very profitable grown for market. Set plants 5 ft. apart in rows 5 ft. apart, or 1742 plants to the acre.

CULTURE DIRECTIONS—

Use short, stout stakes, driven at the end of each row of canes, with a cross-piece 18 inches long nailed to each stake, 2½ to 3 ft. from the ground. On the top, near each end of these cross-pieces, drive a stout nail, slanting toward the stake, upon which to catch a wire. Two lines of No. 14 galvanized wire, one on each side of the row, are fastened to one end of the stakes and run on the ground between the rows to the other end stake. These wires are now drawn as taut as possible and securely fastened to the other end of the row. The

wires are now raised and caught in the nails, thus holding all the canes closely together in the row.

Price, Strong plants \$3.00 per 12, \$20.00 per 100.

York State's Best Strawberries

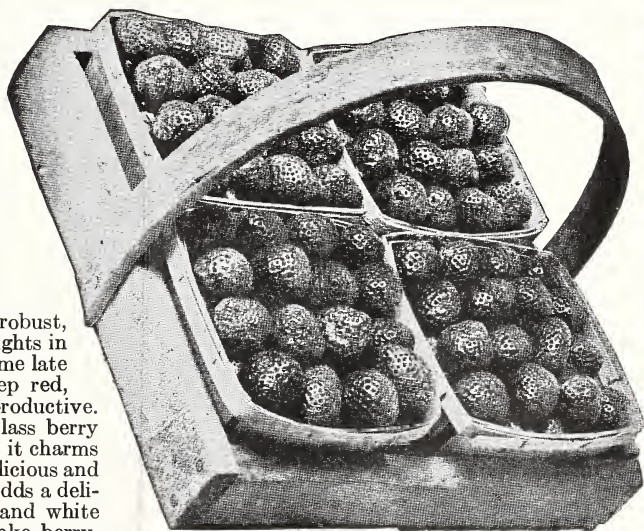

*New York State is noted
for its fine strawberries
We Offer You the Best
Varieties*

JUMBO is just what its name implies — a mammoth plant and a whale of a berry. 64 quarts picked Nov. 7, 1924 sold at 50c per quart. Jumbo is not classed as an everbearer but an enormously productive variety of the regular season. We regard it as the best strawberry on the market today.

SUNSET—Plant extremely robust, will grow on all soils and delights in heavy clay. The blossoms come late and resist frost. Berries, deep red, good fresh or cooked. Very productive.

TABLE QUEEN—A high class berry for any purpose. For dessert it charms and satisfies the palate; it is delicious and appetizing for the sick room; adds a delicate relish to meats, cereals, and white bread; unrivalled as a short cake berry. It is the one berry for those with weak digestion. Bright red, medium to large, vigorous vines and production.

50 of each variety of these real quality and high yielding plants **50 Jumbo—50 Sunset, 50 Table Queen** for \$5.00. Plant this spring and pick berries in June.

Just add cream and a very little sugar.

Special Prices on Large Specimen Fruit Trees

APPLES—PEARS—PLUMS—CHERRIES

Trees 4 Years Old—Seven to Nine Feet Tall

An excellent specimen of super-size 4 year old apple. Such a tree has a good root system to start with. Such trees are worth double the price asked.

**Beautifully Rooted—
Handsomely Branched—
Splendidly Balanced**

NEVER before have we sold super-size fruit trees for so little money. Our big stock is the reason. We must move them. Hence, these prices:

**\$2.00 Each; \$18.50 per 10;
\$150.00 per 100.**

These prices save you money worth saving.

**Trees You Will Feel
Proud to Own—
Proud too, to Show
Your Friends**

Every day in the year someone, somewhere, brimming over with enthusiasm writes telling us of their wonderful satisfaction with our trees.

We reprint below Mr. Ernest Spencer's letter received Dec. 7th.

ERNEST SPENCER
436 South 7th Avenue
Mount Vernon, N. Y.

Dec. 5, 1925

Messrs. Glen Bros.,
Rochester, N. Y.
Gentlemen:

steady it so the wind and storm will not move it. The tree is a wonder, so large and beautiful. It was received on October 12 at 5 P.M. Also the Yellow Gage Plum, something most beautiful, and very large in size and the three apple trees, all planted on arrival and braced for protection and a straw mulch will be placed around them a little later on.

Some time ago I purchased two quince, a cherry and a Hyslop Crab apple tree from you. Let me thank you over and over as the trees are loaded with fruit each year, no let up at all. The Crab apple is a beauty to behold with their red cheeks and its limbs loaded. I stand sometimes and think of you and I am ever so thankful that I bought from your nurseries. My asparagus bed is a wonderful producer—large stalks and plenty of them.

Let me thank you again and will recommend you whenever possible. Yours truly,
ERNEST SPENCER

Just a few of the super-size 4 year old apple, large, beautiful trees; straight trunks, well shaped, branched tops. Note how they tower over the small evergreens in the foreground which average about 3 feet in height.

Varieties of Super-Size Fruit Trees

APPLES

Red Astrachan: Large; deep crimson; juicy. August.

Yellow Transparent: Medium size; pale yellow; good. July and August.

Fameuse (Snow): Medium size; bright red; flesh white. Juicy. October.

Gravenstein: Large; yellow overlaid with red; juicy, productive. September to November.

Twenty-Ounce (Cayuga Red Streak): Very large, yellow splashed with red. October.

Baldwin: Large; deep red; crisp and juicy; vigorous grower; heavy bearer. November to March.

Delicious: Ranks high as a variety for commercial or home orchards. Large; brilliant dark red; flesh fine-grained, crisp, juicy. November to February.

McIntosh: Large; deep red; flesh crisp, tender, juicy. October to December.

Northern Spy: Large; bright red; spread with delicate bloom; flesh tender, rich, delicious. November to March.

Rhode Island Greening: Large; greenish yellow; flesh tender. December to April.

Wealthy: Medium to large; deep red, juicy. October to January.

PEARS

Bartlett: Large; waxen yellow with red blush; buttery, very juicy and high-flavored.

Anjou (Beurre d'Anjou): Large, handsome; greenish yellow, with a dull red cheek on the exposed side, flesh fine-grained.

PEARS

Clapp's Favorite: Very large; yellowish; green to full yellow, rich.

Angouleme: Large; greenish yellow, splashed with russet; a good bearer.

Seckel: Small, but handsome and delicious; very juicy.

Kieffer: Large, very handsome; rich yellow, tinged with red, excellent when canned.

CHERRIES

Dikeman: Large; black.

Governor Wood: Large, light yellow, shaded and mottled with light red.

Lambert: Very large; dark purplish red, turning to almost jet-black when full ripe.

Napoleon: Very large; pale yellow, spotted and shaded with deep red.

Black Tartarian: Very large; black; tender.

PLUMS

Bradshaw: Very large; dark violet-red.

German Prune: Large, oval; dark purple.

Yellow Gage (Prince's Yellow Gage): Large, oval; golden yellow, slightly clouded; flesh deep yellow, rich, sugary, melting.

Lombard: Medium size; violet-red.

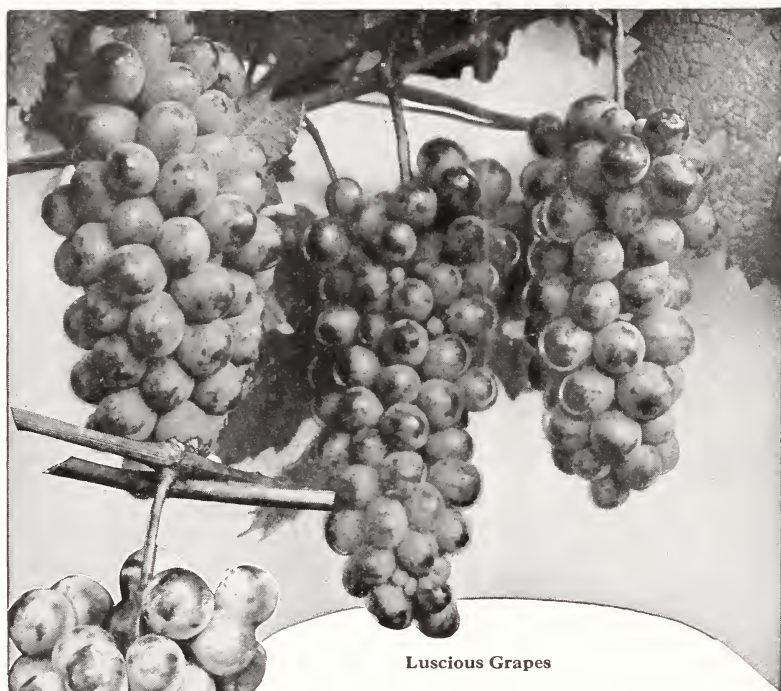

Burbank: Large, nearly globular; clear cherry-red, sweet, meaty and quite firm.

October Purple: Large, round; purple.

Red June: Professor Bailey says, "By all odds the best Japanese Plum." Large; brilliant red.

Big, Juicy Grapes for Delicious Grape Juice

Nothing quite so sure to grow, nothing quite so sure to bear, nothing quite so sure to please every taste. Nothing unusual for these large plants to fruit first year planted. Planted this Spring should produce fruit first season.

Luscious Grapes

Extra large, extra old, extra fine 3-year old grape vines (super size).

Best Varieties for Pressing the Juice

CONCORD (black). Large and handsome, very hardy, productive and reliable; succeeds well over a great extent of country, and is one of the most popular market grapes.

IVES (black). Bunch extremely large, shouldered compact, handsome; Berry—large tender, juicy, sprightly vinous, rich, sweet without pulp. Vine is vigorous, healthy, hardy.

MOORE. Bunches larger; berries large, round, black with a heavy bloom; pulp of good quality; vine notably resistant to disease, very hardy, withstanding temperatures of 20° below zero without injury.

Best Varieties for Eating Fresh

CAMPBELL'S EARLY (black). Clusters large and handsome; berries large, nearly round, black, with light purple bloom; flesh rather firm, but tender; quality rich, sweet, slightly vinous; a strong and vigorous grower.

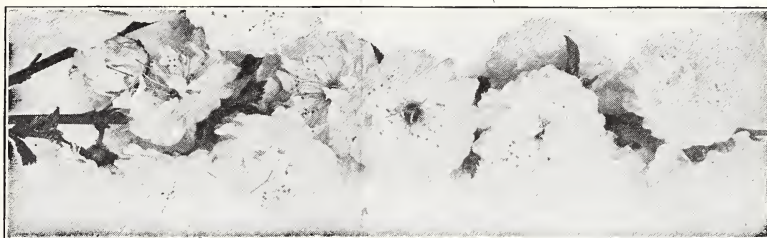

BRIGHTON (red). Flesh rich, sweet, and of the best quality, equal if not superior to Delaware; ripens early. Productive and vigorous.

McPIKE. Bunches large and compact, like its parent, Worden; berries very large, black; pulp tender and very juicy. Healthy and hardy.

GREEN MOUNTAIN. Bunches long, compact and shouldered; berries oval, greenish white; pulp tender, juicy, very sweet and rich; vine hardy, vigorous, healthy, and very productive. Ripens three weeks earlier than Concord.

NIAGARA (white). Bunch medium to large, compact, occasionally shouldered; berry large, roundish, uniform; skin thin but tough, pale green, changing to pale yellow, with a thin whitish bloom; flesh slightly pulpy, tender, sweet; ripens with the Concord.

Prices for these Super-size Super-age Plants \$1.00 each; \$10 per doz.; \$75.00 per 100

Dwarf ornamental trees lavishly bedecked with flowers in early summer.

3 Beautiful Dwarf Flowering Trees For The Lawn

PLANTED IN A GROUP PRODUCES A CHARMING EFFECT

Purple-Leaved Plum: Small, compact-growing ornamental trees that will prove effective as a part of any planting scheme. The foliage is dark crimson, changing to purple as it matures, retaining that color until late in November.

Double-Flowering Almond: Low-growing and bushy, in early summer delighting the eye with its double white and rose-colored flowers that appear in great profusion. One of the most beautiful of the genus.

Bechtel's Double-Flowering Crab: All the Flowering Crabs are fine specimens of ornamental trees and shrubs, but this variety is the finest of the lot, forming a low, bushy tree that is sturdy, hardy, and blooms young. The flowers, wherein lies the tree's chief beauty, are double, of a delicate pink color, and delightfully fragrant; produced early in spring in such profusion that, at a distance, the tree seems literally covered with them. **These 3 for \$4.50.**

3 Delightful Hardy Vines, \$2.00

Ornamentals of this class are so hardy, so easily grown, and so beautiful that they deserve greater attention than they receive. No artist can produce pictures equal to the wealth of beauty displayed by the elegant wisteria, the graceful kudzu vine or the charming and magnificent evergreen bitter-sweet. They are indispensable for screening porches, summer houses, for covering tree trunks and trellises. Many varieties when in flower fill the summer air with their fragrance. Planted generously, they will in a year or two transform a new place. Give them a fine rich soil and they will require little attention.

Wisteria: Picturesque climber with great clusters of pale bluish violet, pea-shaped flowers that make a handsome showing when a vine has been properly trained over a porch or arbor. After becoming established, the vine makes an enormous annual growth.

Kudzu Vine: The most rapid-growing vine in cultivation, attaining, after once being established, a height of 50 feet or more in one season. Its foliage is large and furnishes dense shade; it bears small racemes of rosy-purple, pea-shaped blossoms, towards the close of August. Exceedingly valuable for covering porches, pergolas and trellises.

Evergreen Bittersweet: A beautiful, low-trailing evergreen with aerial rootlets which cling to any support. Forms a lovely decoration on walls or trees, with its masses of red berries in winter. As an evergreen, absolutely hardy wall cover, this plant is unequalled.

Great clusters of light bluish-violet pea-shaped flowers give the Wisteria a distinctive ornamental value.

Our Blue Ribbon \$2.00 Collection of Gladiolus

12 Named Varieties

Nothing will give the planter so much for the money spent, as Gladiolus.

NO. 1. EVELYN KIRTLAND. (New.) The flowers of strong substance, are a beautiful shade of rosy pink, darker at the edges, fading to shell pink at the center, with brilliant scarlet blotches on lower petals. Wide open flowers, slightly fluted and many open at a time. Very tall, straight spikes. One of the finest.

NO. 2. GRETCHEN ZANG. (New). The blossoms are large and sparkling and the most beautiful soft melting shade of pink, blending into scarlet on the lower petals. The color everyone wants. Spike tall and graceful.

NO. 3. GOLDEN WEST. A decidedly showy variety, the color being a clear rich orange-red or scarlet, with golden yellow markings on the lower petals faintly suffused with violet shadings, the only variety we know of showing real gold color. The individual flowers are of large size and stand out boldly, giving the effect of a gorgeous sunset, hence its name Golden West.

NO. 4. QUEEN OF ROCHESTER. Here is a variety that attracts a great deal of attention everywhere. It is a production direct from Holland and very uncommon in this country. The flower stalks grow medium height, very strong and stocky and produce large, wide open, bell-shaped flowers of the most beautiful rich deep rose color, with a golden yellow blotch and throat beautifully tinted. We know of no other variety of Gladiolus anywhere near like it and all who grow it have something very unique and beautiful.

NO. 5. MARY PICKFORD. An extraordinary flower and spike of a most delicate creamy white, throat finest soft yellow, white calyx and stem.

NO. 6. MRS. FRANCIS KING. One of the most popular varieties in cultivation. The spike grows very tall, frequently branched and covered with large flowers of a rich flame-red or pink with small carmine spots on the lower petals and a darker throat. It is a most beautiful variety and a very strong and rank grower under nearly all conditions.

NO. 7. EMPRESS OF INDIA. Flowers are large in size, borne on strong stiff spikes. A rare shade of rich dark brown red—the deepest of its color grown by us.

NO. 12. HERADA. (New). Another good one. Blooms of immense size on tall straight spikes. Massive in every way. The large blooms are pure mauve, glistening and clear, with deeper markings in the throat. A very striking and attractive color.

This assortment should give an abundance of bloom the first season planted. They should be seen growing to appreciate the beautiful shades and colors. Read the descriptions of each and order a supply of bulbs.

Our special price for this group of 12, all different —no two alike, \$2.00.

These bulbs can be planted in March, April, May or June, according to location and should bloom in July, August and September. Each bulb will make from one to four spikes of bloom and a dozen or more flowers on each bloom. They last a long time and keep 10 days or more as cut flowers in the house. We send out only large size blooming bulbs. You will never get a finer collection at this price. It is not necessary to write out each name separately—merely order as "Blue Ribbon Collection."

NO. 8. PEACE. A very strong healthy grower and a free bloomer. The flowers are large, pure white in color with a slight tinting on the lower petals, making it very delicate and attractive. The flowers are correctly placed on a heavy straight spike, and it is one of the best of the white varieties.

NO. 9. PRINCE OF WALES. An early flowering variety with splendid spikes of large flowers of delicate apricot-pink suffuse salmon.

NO. 10. WAR. A magnificent dark variety with tall spikes well filled with large flowers of a rich ox-blood red shaded crimson black. Flowers often measure 7 inches across. The foliage is broad and deep green. Truly a wonderful variety.

NO. 11. BLUE KING. Acknowledged to be the best blue Gladiolus. It grows a splendid, tall, well finished spike with medium sized flowers of fine shape, well set on the spike. The color is a rich, deep indigo blue, making it strikingly beautiful in combination with other varieties.

Our 10 Best Hardy Chrysanthemums

PLANT them outdoors this Spring and enjoy their exquisite blooms next October and November after all other outdoor flowers are gone. When in bloom are a perfect mass of flowers.

1 Plant Each of Our 10 Favorites for \$4.00

Normandie: Early large light pink.
Petite Jean: Pinkish white.
Excelsior: Yellow.
White Dotte.

Hardy Chrysanthemum —Are a joy forever

Beautiful Chrysanthemums on a cool fall morning.

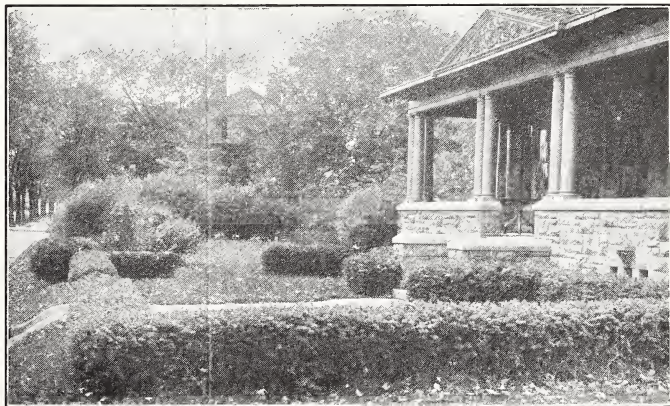

Barberry Thunbergii (*Japanese Barberry*)

*Desirable as Hedge or Planted as Individual Shrubs
Around the House Foundation or in Borders*

A VERY beautiful general purpose dwarf shrub. Useful for many reasons. It grows to 3 or 4 ft. in height; is very hardy anywhere; will thrive in sun or shade. Is fine in groups or in the shrubbery and makes one of the best low hedges, either natural or formal as it will stand shearing. It is graceful in habit; has small yellow flowers in June, followed by bright scarlet berries in the fall which usually hang during the winter, giving a bit of color to the winter aspect.

The foliage is a very attractive green during the summer and the autumn colors of the leaves are among the most superb of any of the shrubs. This shrub, because of its protective thorns, furnishes favorite nesting sites for birds during the summer and its fruit furnishes them with winter food.

Prices 12-18 inch,
\$3.00 per 12; \$20.00
per 100. 18-24 inch,
\$4.50 per 12; \$35.00
per 100.

Barberry Thunbergii makes the best hedge. Set plants 1 foot apart.

Hardy Native Ferns

Nearly every home owner can find some particular spot about the grounds where ferns would make an effective setting.

FOR shady locations, no class of plants can equal the ferns. They are easily grown in ordinary soils and will thrive where it is often impossible to make flowering plants succeed. The ferns listed are dug in large clumps with one to four clusters of fronds in a clump. They may be used for massing or planting separately but give an especially fine effect planted with evergreens or Rhododendrons.

CINNAMON FERN: One of our most showy ferns. Often grows 5 ft. high—fronds deep green, sometimes 6 to 8 inches wide. Thrives in open sun or moist, shady locations. Attractive in masses under trees. 50c each; \$4.00 per 10; \$35.00 per 100.

OSTRICH FERN: Erect dark green, feathery foliage, making a most effective background for smaller ferns. The Ostrich fern grows to a height of 3 ft.—width of fronds 6 to 10 inches. Thrives in shaded nooks or open sun. Should be well manured. 50c each; \$4.00 per 10; \$35.00 per 100.

SENSITIVE FERN: A hardy native fern with broad triangular leaves reaching a height of about 1 ft. It will thrive in moist soils and open sunny locations or shaded spots. Very good for the rock garden. 50c each; \$4.00 per 10; \$35.00 per 100.

ROYAL FERN: Of the large ferns, this is one of the prettiest, growing to a height of about 3 ft. Thrives either in sun or shade, preferring a moist soil. The leaves are small and pale green, sometimes bearing panicles of flower-like fruits. 50c each; \$4.00 per 10; \$35.00 per 100.

LADY FERN: Exceedingly showy—grows 2-3 ft. high with finely cut foliage. This is one of the best for general culture succeeding in sun or shade, preferably good, rich soil or moist location. 50c each; \$4.00 per 10; \$35.00 per 100.

HAY SCENTED FERN: Another splendid variety that will grow in either sun or shade. This is a very handsome, vigorous growing species. It prefers a moist soil but will thrive in dry, sunny spots. Good for massing in open ground or under trees. 2 ft. tall. 50c each; \$4.00 per 10; \$35.00 per 100.

NO ORDERS FOR FERNS ACCEPTED AMOUNTING TO LESS THAN \$2.00.

The Biggest Dollar's Worth You Ever Received

Only \$1 FOR 7 Great
THESE "Glads"

Green Globe Artichoke (Perennial)

SIX PLANTS ENOUGH FOR A FAMILY GARDEN

Easily Grown

Hardy Delicious

Artichokes are a delicious delicacy found on the menus and served at leading hotels, restaurants, dining cars, etc. They are easily grown in back yards, along fences, and in the vegetable garden, requiring very little care and attention after planting. The Green Globe Artichoke grows to a height of three to five feet with numerous branches and the roots should be set about 5 feet apart. The portion eaten is the underside of the head, before the flower opens. The whole head is removed and boiled, the leaves laid aside and the bottom eaten dipped in butter with a little pepper and salt—a luscious delicacy

We offer extra strong roots for spring planting at **\$1.00 each, \$5.00 per six, \$8.50 per twelve, \$50.00 per hundred.**

(IMPORTANT! Do not confuse Green Globe Artichoke with the common Jerusalem Artichoke. The Jerusalem is in no sense a true Artichoke, but the tuberous root of a species of sunflower.)

Exact size of Green Globe Artichoke

laid aside and the bottom eaten dipped in butter with a little pepper and salt—a luscious delicacy
